Subject: USS TAR DECANter PITCH TRAPS

Jim - I have a letter drafted for the tar decanter pitch traps at Clairton Works, which I made for your division director's signature. Before I e-mail it to you to finish off, I need to verify one last piece of information with Bill Kubiak. He has been on vacation. While I am waiting, I dropped in the mail to you a 1990 letter sent to USS from Kaiser engineers indicating that someone from Kaiser talked with EPA, with the upshot of the conversation being that Kaiser felt that the tar decanter pitch traps were not covered by Subparts L or V. Bill found it in his files and faxed it to me. I didn't want to fax it to you since it is a poor copy to begin with. According to Bill, that's what his looks like. wojo

Jim - I am forwrding the message I just received from Kubiak. This is what I needed to finish off the letter.
I'll get the letter to you asap. wojo
